

Match Function / Bank Feeds

1. Click on the tab called Recognized
 2. When the text says **1 Record Found**
 - a. Review the date in the column under category/match and review the date on the left side of the row.
 - b. If the dates are within a few days of each other, choose **match**
 - c. If the dates are weeks or more apart, click on the line and then click on the circle for **add**.
 3. When the text says **2 Records Found**
 - a. Click on the line to expand the details
 - b. Review the related transactions, pick the transaction with the closest date to the date on the left side of the downloaded transaction.
 - c. If there are multiple transactions with the same date... review the bank detail for more information to help you identify which line to match to the transaction.
(Note: There are no shortcuts to make this easier/smooother/faster.)
